Introduction : In this assignment, we are performing System Testing on a REST API called Jira-Lite Via Postman . It is a lightweight issue-tracking system where users c

Scope of Testing ::

Module	Endpoints to be Tested	Purpose
Authentication	POST <code>{{baseURL}}/auth/register</code>	To create a new user account.
	<code>{{baseURL}}/auth/login</code>	To authenticate a user and get a JWT token.
Users	GET <code>{{baseURL}}/users</code>	To retrieve the profile details of a specific user.
	PATCH <code>{{baseURL}}/users</code>	To update the current user's profile information (like username or email).
Team	POST <code>{{baseURL}}/teams</code>	To create a new team in the system.
	GET <code>{{baseURL}}/teams/{{teamId}}</code> DEL <code>{{baseURL}}/teams/{{teamId}}/members/{{j}}</code>	To view details and members of a specific team To remove a specific member from the team.
Projects	POST <code>{{baseURL}}/projects</code>	To create a new project (either open or assigned to a team).
	GET <code>{{baseURL}}/projects</code> <code>{{baseURL}}/projects?teamId={{teamId}}</code>	To list all available projects. To filter and view projects belonging to a specific team.
Issues	POST <code>{{baseURL}}/projects/{{projectId}}/issues</code>	To create a new issue under a specific project.
	GET <code>{{baseURL}}/projects/{{projectId}}/issue</code>	To list all issues related to a specific project.
	<code>{{baseURL}}/issues?status=open</code>	To filter and view all issues that are currently in 'open' status.
	<code>{{baseURL}}/issues?creatorName=jarek</code> <code>{{baseURL}}/issues/{{issueId}}/submit</code>	To filter and view issues created by a specific user To mark an in-progress issue as resolved.
Issue Life Cycle	PATCH <code>{{baseURL}}/issues/{{issueId}}/abandon</code>	To stop working on an issue and return it to 'open' status.
	<code>{{baseURL}}/issues/wrong-id-456</code>	To verify error handling (404) for non-existent issue IDs.
	<code>{{baseURL}}/issues/{{issueId}}/accept</code>	To mark a resolved issue as closed (completed).
	<code>{{baseURL}}/issues/{{issueId}}/reopen</code>	To return a closed or resolved issue back to 'open' status for further work.
Edge Life Cycle	POST <code>{{baseURL}}/issues/{{issueId}}/comments</code>	To add a comment or a reply to a specific issue.
	GET <code>{{baseURL}}/issues/wrong-id-789/comments</code>	To verify if the system returns a 404 error for comments on a non-existent issue.
